Uzelac Industries is a Sheet Metal Worker Local 18 Union Shop.

### **Benefits**

- Local 18 Union Benefits

### **Company**

Uzelac Industries Inc. is one of the top rotary dryer manufacturers in the world. We have spent the last 30 years as the leading rotary dryer company for the rendering industry and have worked hard in recent years to expand our market reach to other industries such as dairy bedding, poultry manure, municipal biosolids, and many more. This expansion has ramped up growth, driving a need for additional talented team members to keep up with demand and allow the growth to continue. We offer the stability and benefits of being a well-known name in our industry but still present all the benefits of being a small company. We are looking for someone who is self-driven, creative, and has a strong desire for continual learning.
